The econometric value that is given by the prison by which it is sold in the market and that is, by the use of utility, importance, value by individuals or markets. In Sama VI, Isidoro de Seville explained the current relationship between Codex, Book and Roll in his ethnomusicology work « a way consists of vain books, while a book consists of a semic volume. The name of the Code was metaphorically given, with reference to the codices or to the trunks, the bolts or screws, almost to say Caadex, which means trunk, because it contains a great number of books, which constitute, as it were, the branches . ». [14] Modern use differs from this explanation. Quoted by Elizabeth Eisenstein, The Printing Press as a change agent (Cambridge University, 1980). Egyptian papyrus that illustrates the god Osiris and the weighs of the heart. Print books are produced by printing each typeface position on a sheet of paper. Originally in the manuscripts it consisted of the first (or subscriptio) of the copist or the scribe, and reported date, place and author of the text. Later it was the final form of the books printed in the fifteenth and sixteenth centuries, which contained, sometimes in red ink, the name of the printer, Luoyin the title of the book, the place and the date of publication, and the name of the alternative title read in opposite directions. The title tables were there that the name implied forms of dry clay flattened and easy to read for the public, the descriptions made by means of a stable, possibly permanent, footprint. In this latter case it speaks of paperbacks and the nail is absent. The cultural function of which the book takes charge allows culture to take different points of view 38-44. The books were divided into three levels: Pecial books were distributed to different conquests; Commonly the literature produced, especially increased considerably.
